OHIO VALLEY FOREST NURSERY

R. L. McCOY, PROP.

LAKE, SPENCER CO., INDIANA.

Genuine guaranteed Catalpa Speciosa or hardy Catalpa seed from the largest forest trees in the Ohio Valley bottoms. We guarantee these seeds to be true Catalpa Speciosa. They have been pronounced Catalpa Speciosa by the Forestry Service. You may submit them to any expert in the United States and if not true, we will gladly refund your money.

We are now making a special price of 90c per pound. Ten thousand seeds of Catalpa Speciosa weigh one pound. With an order of ten pounds, we give printed instructions how to grow Catalpa Speciosa Seedlings. By our method we guarantee 90 per cent of the seed to germinate and grow. As to the quality of our seed, we refer you to Hon. Jas. A. Hemenway, U. S. Senator, Washington, D. C., who has been personally in touch with our nursery and seed work for years and has purchased many thousands of our seedlings.

Please send us your price list, as we have a large want list

We grow Catalpa Speciosa Seedlings by the millions. We guarantee our seedlings to be the true Catalpa Speciosa and will gladly refund money and pay all damage upon sufficient proof that they are not. As to the genuineness of the seedlings, we refer you to Mr. T. P. Littlepage, Clerk of the Committee on Public Expenditures of the U. S. Senate, Washington, D. C. As to our reliability, we refer you to the Lake State Bank, Lake, Ind.

Why plant Catalpa Speciosa?

An Epitome of Forty-one Reasons.

- | | |
|--|---|
| 1. It will grow everywhere within the boundaries of the U. S., except in arid regions. | 21. Excels for building material |
| 2. By 1925 American forests will be exterminated. | 22. Equals walnut for carving |
| 3. The only valuable tree which will mature in time. | 23. Makes good fence posts |
| 4. Is antiseptic; requiring no chemical treatment. | 24. For mine timbers not surpassed |
| 5. It grows in almost any soil | 25. Ideal wood for shingles |
| 6. Is easily propagated and managed | 26. Every quality for interior house finishing |
| 7. Demands no professional manipulation | 27. Good plow beams and handles |
| 8. Most durable wood known | 28. Used for centuries for boat building by the Indians |
| 9. Valuable for cross-ties; have endured for half a century | 29. Suitable for all car construction |
| 10. Nothing better for telegraph poles | 30. Qualities of ash for agricultural implements |
| 11. Miles of living trees used for telegraph lines | 31. Blocks are used for wood engraving |
| 12. Makes magnificent veneers | 32. Strong and durable piling timber |
| 13. Superior to oak furniture | 33. Less insect enemies than other trees |
| 14. Lighter than pine | 34. Fewer diseases than other trees |
| 15. Stronger than oak | 35. Once planted becomes a perpetual forest |
| 16. Tougher than hickory | 36. Quick growth for wind break |
| 17. Freedom from warping | 37. A desirable shade tree |
| 18. Neither shrinks nor swells | 38. Beautiful flowers for ornament |
| 19. Makes best wood pulp and book paper. | 39. Roots never clog sewers |
| 20. Immense yield per acre | 40. Will produce cross-ties at 20 cents apiece |
| | 41. Practically all uses for which wood is adapted. |
